Feedback Paper “Adrenaline Constructions”

Astenkick

The cooperation with the company “Adrenaline Constructions” during the project and construction phase of the Astenkick was outstanding. We were always well looked after during every planning step as well as during the construction.

As with any complex construction project, especially because it is the very first zipline that offers to fly while sitting and lying, there were minor technical issues with the Astenkick at the beginning. The company Adrenaline, in particular Carlo and Samuel, solved these problems immediately. The quality of their work is very good. Carlo and Samuel were always available for us.

The Astenkick GmbH has been working with the company Adrenaline for 4 years now. Carlo and Samuel showed in these years their reliability, the quality of their work and their passion for the product.

Sincerely,

Christian Mienert

Adrenaline Group

In the heart of the Majella Park, on the slopes of the Morrone, arises the ambitious project of the zip line by the Adrenalina Group. We're in Pacentro. The challenge to combine the emotion of a breathtaking experience is associated to the possibility to enjoy a beautiful and varied landscape: from the splendid skyline of the silent village to the majestic beauty of the Morrone that wraps the flight.

A mix of emotions within minutes make the Majella zip line a unique experience, made possible by the professionalism and cooperation of the Carlo Trebo staff, wich has handled with competence and optimism the complexy of the place, both from a physical and procedural point of view, for the transposition of all the authorizations of the institutions involved.

Testimonials

"It was a pleasure to work with Adrenaline Constructions and achieve a historic result: the first and longest Zipline over the sea! We're proud to have chosen this serious, professional Italian company to create a new concept of entertainment on board of MSC cruise ships.

The project was extremely demanding, but Carlo Trebo, Samuel Miano and their team worked tirelessly. It was great to see such attention to detail in design and execution, and their strive to ensure that everything ran perfectly!

After months of work on tight deadlines, we had the pleasure of testing the Ziplines over the sea.

What a joy to discover we had absolutely nailed all the goals we had discussed years before!

We were very impressed with their reliability, punctuality, technical expertise and dedication to the work."

Mimmo Lubrano

New Building Project Manager

MSC Crociere

"We worked with Adrenaline Constructions on an extremely ambitious project: building a Zipline to the center of Milan for the launch of the new BMW X1.

Despite the very short deadlines, we found a highly professional team: great collaborators, who ensured everything was ready on time.

The event went on for a whole week and in that time more than 2,300 people were able to fly above Milan! The Adrenaline staff were tireless and always smiling. In short, BMW Urban Zipline was a challenge we tackled together and a fabulous experience".

Marta Marini

Project Manager App Eventi Srl

Our thoughts about the company Adrenaline:

We are very satisfied with our Zipline in Rawabi and the team has been and it's still very professional.

The zipline has been delivered before the expected date, earlier than agreed and it was built in record time.

Everything went well even if we have some problems due to the presence of sand and an unusual weather condition in Rawabi which made the team work under adverse conditions.

Moreover, Adrenaline also delivered us new mechanical components unexpectedly, even though we didn't agree before.

We still have a good relationship and we still stay in touch, so we are 100% satisfied with Adrenaline!

Testimonial Letter

We wish to formally express our sincere appreciation to Adrenaline Constructions for their exemplary work on a highly ambitious project in Georgia: the construction of the longest parallel Zipline in Europe, fully compliant with European standards. The Zipline's starting station is situated at an elevation of 2450 meters above sea level. Despite the challenging and demanding working conditions, the team at Adrenaline Constructions successfully completed the project within the agreed timeline and to the highest possible standards. We were particularly impressed by their meticulous attention to detail in both the design and execution phases. The completed Zipline is a true testament to craftsmanship, showcasing the highest quality in every aspect of its construction. In addition to delivering an outstanding project, Adrenaline Constructions has proven to be a reliable and trusted partner, with whom we anticipate continuing our collaboration on future projects.

Sincerely,
Director of Anagi LLC
